

CannuSeal

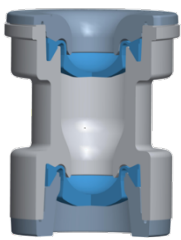

S Y S T E M

What is the CannuSeal® System?:

The CannuSeal® product platform is designed to bring enhanced performance to access or connection applications by securely sealing against cannula, scopes, connectors and other instruments during insertion/connection and withdrawal/disconnection.

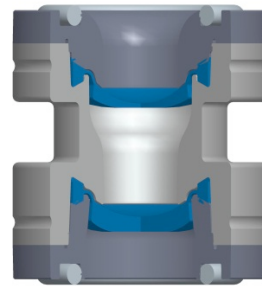

Suited best for medical device applications, the CannuSeal® platform is available in multiple size assemblies, each with different seal combinations, designs, materials and specs. Our goal is to provide you with an optimized system for your application.

Standard designs available for sampling:

CannuSeal® 375

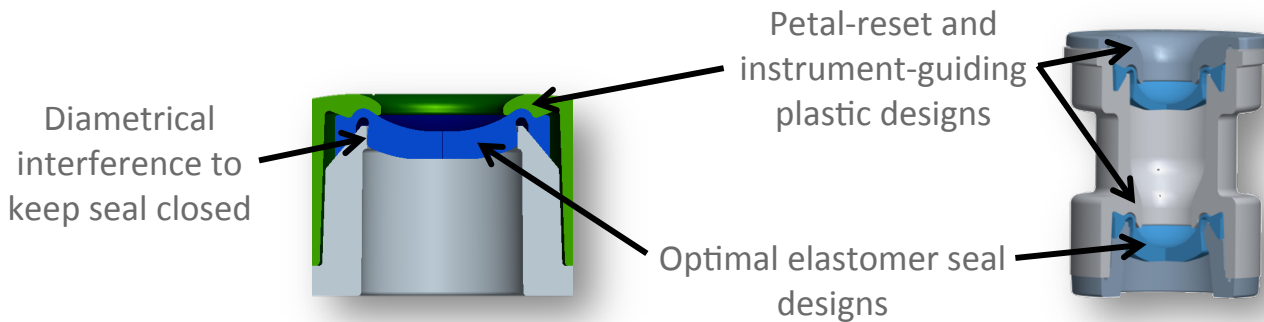

Accepts up to 13fr instrument
Polycarbonate housing; silicone seals

CannuSeal® 634

Accepts up to 26fr instrument
Polycarbonate housing; silicone seals
