

Welcome!

Thank you for reading the first edition of LMS eNews. With these periodic newsletters, we hope to inform you of upcoming LMS news, product releases, and other flow control products and services updates that you will find beneficial.

Our mission for 2009

To provide our customers with cost savings and/or revenue generating solutions by offering the highest quality, value-added flow control products in the market.

Why choose LMS?

As the world's largest producer of elastomeric flow control valves and plastic assemblies, with close to 9 billion valves/valve assemblies sold, LMS offers the highest value products to customers. With 23 years of experience and major successes in consumer, commercial and medical applications, LMS's products and design/engineering services provide our customers with **cost savings and revenue generating solutions.**

LMS partners with companies to provide the best valve assembly solution possible, **reducing total assembly costs** by designing, engineering and producing an entire plastic valve assembly. So whether you are ready to improve the performance of a current product, reduce costs, or are in the design stages of a brand new one, LMS is with you every step of the process. [Contact us today for information on how we can help you reduce costs and/or generate more revenue!](#)

LMS at the MD&M West Show

Free show passes to anyone interested!

LMS is exhibiting at the [Medical Design & Manufacturing West exposition](#) in Anaheim, California February 10-12, 2009 - booth number **2804**. This is a great opportunity to stop by and learn more about our company, the solutions we provide, and give you the chance to talk directly to our company engineers, sales team and executives.

While you're there, pick up free samples of our **new MediSnap® valve cartridges**. These, along with other product samples, will be on display at our booth. LMS has flow control solutions in drug delivery, wound management, dialysis applications, respiratory devices, and several others!

If you're not in the medical industry but would like to meet with us while we're in California, please [contact us](#), and we will arrange a time and place to meet!

New flow control product **new MediSnap® and SureSnap®**

LMS is introducing its new standard design MediSnap® and SureSnap® valve cartridges. These snap-fit cartridges securely retain LMS's patented SureFlo® and MediFlo® valves, making valve retention problems an issue of the past! These valve cartridges are available in various sizes. Each cartridge size can be fitted with different performing valves to meet your specific flow control needs. With the snap-fit design, assembly of these cartridges into your application is simple and effective. The valve cartridge is already a big success with hundreds of millions sold for a variety of different products and applications. If the stock sizes aren't what you're looking for, [contact LMS](#) and let us show you how we can easily customize a design for your individual requirements!

[Visit LMS's contact page](#) to request samples of MediSnap® and SureSnap® cartridges!

LMS MediSnap® valve cartridge **makes valve assembly a snap!**
